PancakeGames token, "GCAKE," supports multiple blockchains and is easy to use for awider range of users.

Role of PancakeGames: Providing Services

PancakeGames offers a range of specialized services to gaming companies that seek to embark on a Web3 business.

- Token
- NFT
- Marketplace for NFT
- Staking
- Marketing & Promotion

We've already offered all services except the NFT Marketplace. These services lead to partnerships with various projects.

PancakeGames is an NFT gaming platform with a wide variety of content, connecting multiple NFT projects with GCAKE holders. GCAKE is its core community-oriented token. It also contributes to the marketing of partner projects through various schemes.

Pre-Sale IDO(including NFT) of NFT games

Establishment of e-SPORT teams to attract potential users

Hosting events such as NFT game competitions, contests, conferences, etc.

Operation of own NFT marketplace and collaboration with NFT marketplaces (including gaming guilds)

Pre-Sale IDO(including NFT) of NFT games

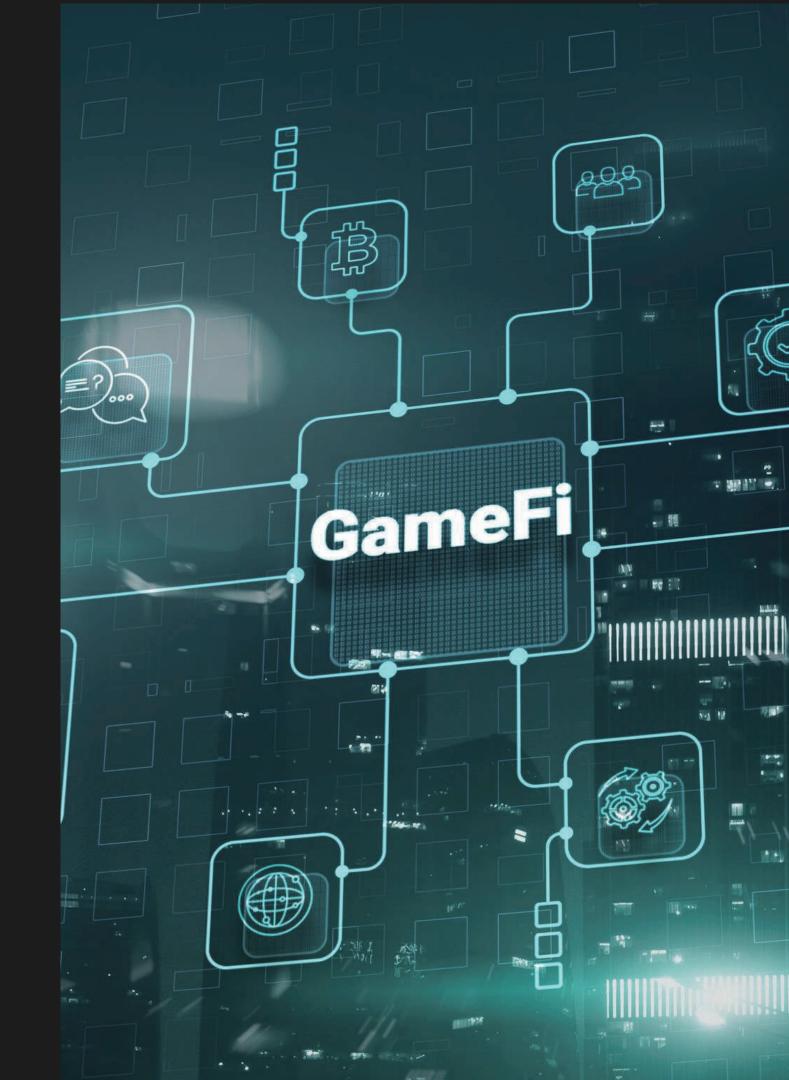

Typical problems faced by early GameFi projects are funding and attracting new users.

PancakeGames provides appropriate solutions to the diverse problems faced by each project. For example, we work with worldwide projects to strategically market and promote NFT sales.

In the near future, PancakeGames will develop an IDO platform dedicated to NFT games to make it easier for partner projects to implement IDOs. When implementing IDOs, priority will be given to those with high user expectations and reputation through social media.

Establishment of e-SPORT teams to attract potential users (1/2)

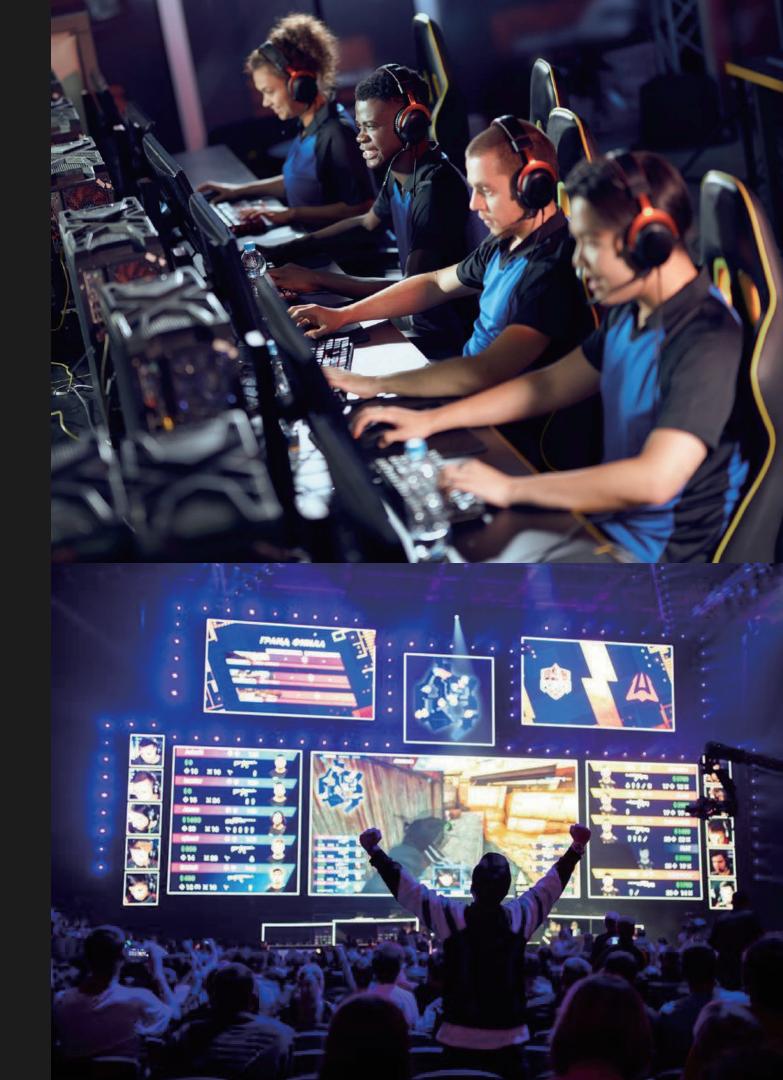

It is generally believed that GameFi cannot sustain the price of tokens and NFTs without new users joining constantly. We fully understand this problem and are ready to evolvefrom the current ecosystem.

The answer is "e-Sports".

e-Sports is more competitive and public than regular gaming experiences. Highly skilled players and teams become popular, and sponsorships are provided, making it a professional sport in many regions.

Establishment of e-SPORT teams to attract potential users (2/2)

We can expect new investments in the ecosystem by promoting e-Sports for NFT games through nurturing alented young players and organizing gaming competitions.

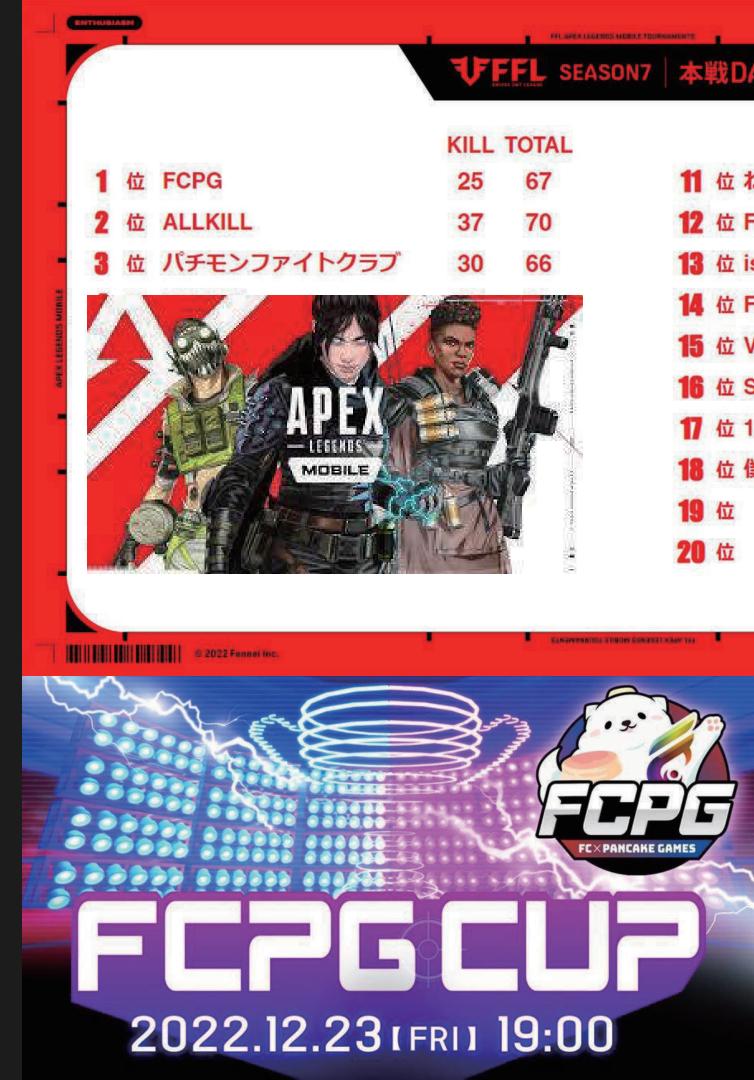

In addition

- Organizing sports betting
- Expanding sponsorships

would accelerate user acquisition and stimulate investment.

In 2022, we established the professional team FC PancakeGames "FCPG" and succeeded in gathering many fans.

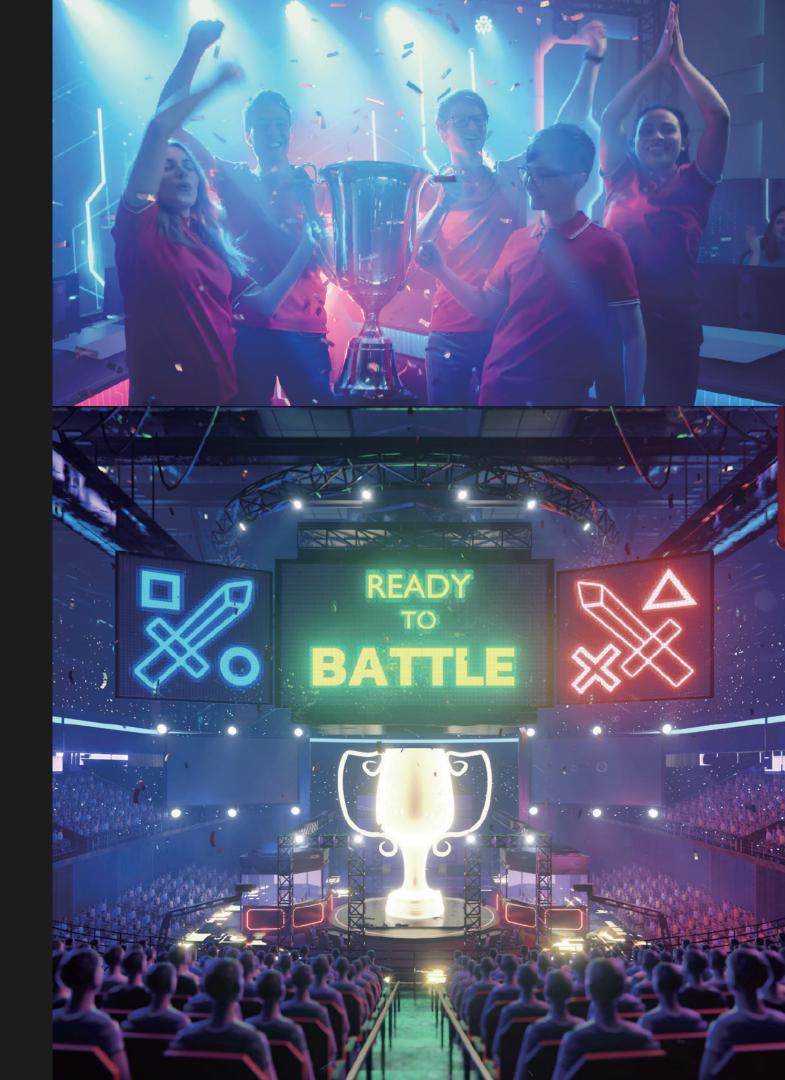

Hosting events such as NFT game competitions, contests, conferences, etc.

PancakeGames and our partner NFT Game Project will host GCAKE holders' participating content. (Conference is under consideration to be held at the same time).

We will also regularly hold game competitions and contests in which our partner KOLs participate.

Winners of these events will be able to win rare NFTs of various games as prizes, thereby activating the economic sphere of related game titles and GCAKE.

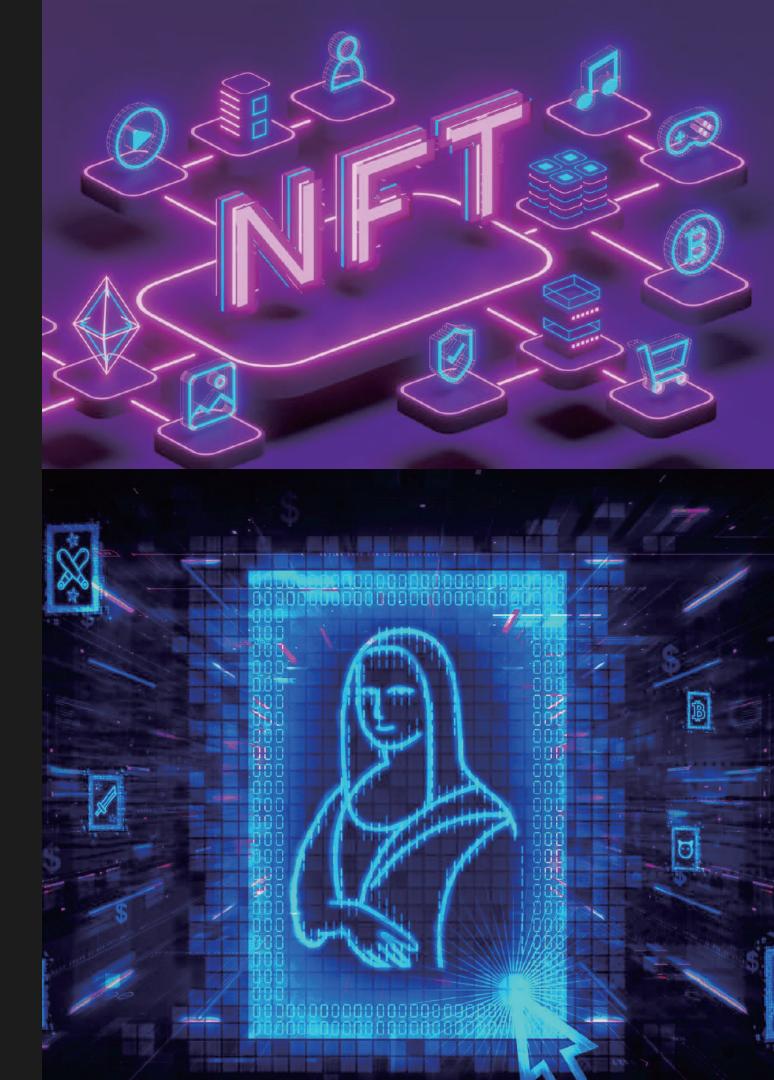

Operation of own NFT marketplace and collaboration with NFT marketplaces (including gaming guilds)

PancakeGames will work with marketplaces worldwide to introduce relevant NFTs and GameFi. This expansion of NFT sales channels will allow PancakeGames to reach potential users in various countries, which is expected to increase the project's valuation and capitalization.

In addition, PancakeGames users will have priority to purchase rare items (NFTs) that can be used in related games. And it will benefit its partner marketplaces by selling exclusive NFTs only available in certain marketplaces.

Meanwhile, we are also planning to develop our own NFT marketplace.

Projects Joining PancakeGames

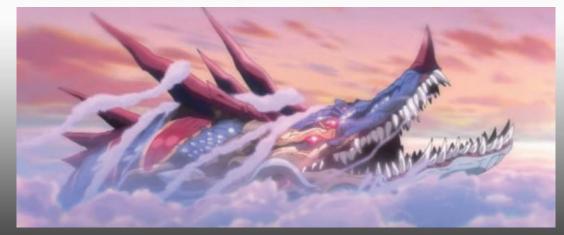

Overview of Projects Joining PancakeGames

SKYFRONTIER

SKY FRONTIER is a new blockchain game title from BIGBANG Inc., a partner company of PancakeGames, a P2E-based multi-player RPG in which players fight together to defeat giant creatures lurking in the sea of clouds. They've partnered with "au Portal", operated by the big 3 Japanese telecom carriers, au. Future expansion of users among au users is expected.

Coming Soon

We will continue to invite various projects worldwide to join PancakeGames. The more projects that participate in, the more the PancakeGames economy will grow.

Token Design of PancakeGames "GCAKE"(1) (Token Economy)

Another reason for the popularity of GCAKE is that it is a deflation token.

For example, GCAKE used in new game token presales, NFT sales, casual games, etc. will be "BURNED" at a certain rate.

At the current Burn rate, it is expected to deflate at the end of 2024.

The pace will also increase as more projects participate.

Token Design of PancakeGames "GCAKE"(2) (Token Economy)

Currently, of the total 10 trillion GCAKEs issued, 4 trillion are in circulation. The GCAKE, like Bitcoin, is designed to halve the number of new issues, and the remaining 6 trillion will be added to circulation as follows. The amount of new GCAKE in circulation will be halved each year.

2022:2 Trillion

2023:1 Trillion

2024:0.5 Trillion

2025: 0.25 Trillion

2026:0.125 Trillion

This results in a scarcity of GCAKE.

Scarcity increase

PancakeGames has the largest community in Japan

PancakeGames is very active in community activities. For example, the chat group on LINE (most widely used messenger app in Japan) was spontaneously founded by volunteers and today has become one of the largest communities in Japan.

Our Twitter has been generating a significant amount of traffic, with impressions reaching up to 500,000. Given that our audience is not limited to Japanese-speaking users, this suggests a growing international recognition of our brand and content.
